Reconciling Science and Policy in the Delta

In mid-October more than a thousand scientists, managers, and policymakers will descend into Sacramento to discuss ways of improving the health of the Delta – a region key to California’s water supply and the health of its ecosystems.

The 7th Biennial Bay-Delta Science Conference presents the latest advances in scientific information and ideas on resources and ecosystem functions in the California Bay-Delta, from its watershed to the San Francisco Bay. The goal of the conference is to make new information available to the broad community of scientists, engineers, managers and stakeholders working on Bay-Delta issues.

WHAT: The 7th Biennial Bay-Delta Science Conference
Ecosystem Reconciliation: Realities Facing the San Francisco Estuary

WHEN: Tuesday, October 16, 2010 to
Thursday, October 18, 2012

WHERE: Sacramento Convention Center
1400 J Street
Sacramento, CA

WHO: More than 1000 scientists, managers, and policymakers. Many will present the latest results of their research and the most recent discoveries that will influence management of the Delta as well as our understanding of how this complex system functions.

MEDIA CONTACT: Eric Alvarez 916.445.5383 office

###

"Coequal goals" means the two goals of providing a more reliable water supply for California and protecting, restoring, and enhancing the Delta ecosystem. The coequal goals shall be achieved in a manner that protects and enhances the unique cultural, recreational, natural resource, and agricultural values of the Delta as an evolving place."

– CA Water Code §85054
